

LE FORZE
&

I PRINCIPI DELLA
DINAMICA

$$\vec{F}_{RIS} = 0$$

$$\vec{v} = \text{const} \quad \vec{a} = 0$$

$$\vec{F} = m \vec{a}$$

$$\vec{F} = \frac{\Delta(m\vec{v})}{\Delta t}$$

$$\overrightarrow{F}_{3,1} = - \overrightarrow{F}_{1,2}$$

$$m \rightarrow \text{Kg}$$

$$a \rightarrow \text{m/s}^2$$

$$\underline{1N} = 1 \text{Kg} \cdot 1 \text{m/s}^2$$
